

Technical Annexure

Electric Beveling Machine

Flexible to use for the processing of bevels and raddi on plates, containers, inner, and outer edges, counter profiles, drilling and pipe ends with milling heads for all bevel angles with indexable inserts.

Good Handling and compact design for Manual Hand Operation.

Technical Specification:

Bevel Width in MS : 1-15mm

Bevel Angle : 0- 60⁰ or Better

Radius: 2-8mm (R=2mm , R=4mm , R=8mm)

Tool/ Inserts Set : 04 or More

Power Input: 2500 W or Less , Voltage : 240 V

Set of Inserts : 02 for each Milling Head (Total 06 Sets ,i.e Total Inserts :24 Nos.)

Milling Head: For Radius 2mm , 4mm and 8 mm

Weight : 10 Kgs or Less

Terms & Conditions

- The Product offered should be a Standard Product with necessary safety features as per BS/IS standards.
- Installation & Commissioning with Performance report from Minimum 02 User Organizations of the offered Product to be submitted with Bid (including the User Contact Details email & Mobile)
- Warranty of Two Years or More to be provided Onsite
- Service Support Declaration for 05 Years (Minimum) from OEM to be submitted. The OEM's Communication Email and other details to be provided. The authenticity of Declaration will be verified prior to ordering.
